superior dairy technology

# THE TOUGHEST **NEW** PUMP IN THE BUSINESS! NO EFFLUENT!

## NEW GENERATION EFFLUENT PUMP

The new generation of effluent pumps takes advantage of 10 years of accumulated research and design expertise, together with the use of high quality materials and components. The end result is a range of extremely strong and reliable pumps.

The Numedic pump is a sound investment in pumping technology and will provide many hours of trouble free operation.

### SHAFT

Tough precision CNC machined **50mm diameter high tensile steel** shaft gives very low vibration levels.

### BEARINGS

Modern state of the art bearings provide a **high degree of operational reliability.**

### MOTORS

Very efficient MEPS (Minimum **Energy Approved Standards**) electric motors for increased efficiency.

### SIZES

Motor sizes range from 7.5kW to 22kW to suit pumping requirements.

### LUBRICATION

High performance LGHP 2 grease and low running temperatures ensure a **long, economical service life.**

### QUALITY

Castings manufactured from **heavy duty SG iron and CNC machined** to very high dimensional accuracy.

### CHOPPER BLADES

Easily fitted to all pumps to help chop up the extra fibre content of effluent produced from feedpads.
